

# Unit: Creativity

詳細內容雙語對照 / Detailed Bilingual Content

## Lead-in Questions / 導入問題

Have you ever won a prize? If so, what for? If you could be awarded for a prize, what would you like it to be awarded for? Does award always have to be serious? In this unit, we will learn about an award that is less serious but still scientifically important. Do you know what I am referring to?

你曾獲得過獎項嗎？如果有，是為了什麼？如果你可以被授予一個獎項，你希望是為了什麼？獎項一定要很嚴肅嗎？在本單元中，我們將學習一個不那麼嚴肅但仍然具有科學重要性的獎項。你知道我指的是什麼嗎？

## Defining Creativity & Awards / 定義創造力與獎項

Let us start by discussing 'creativity'. We can see its definition in the dictionary is "the ability to produce new ideas or things using skill and imagination". In order to own the 'ability' to be able to become creative, one must accumulate knowledge in the daily life, so that someday when you need the new knowledge, your brain could provide you enough information (our schema, or information base) to become your

'inspiration'. The knowledge accumulation does not happen in one day, it has to go through a really complicated and long process to be able to store in our brain for later retrieval. This is why people who devote their time so much to become experts in some fields deserves our respect and should be awarded with great honor, such as scientists and researchers. Many awards are world-famous. Do you know the following awards?

讓我們從討論「創造力」開始。我們可以看到它在字典中的定義是「利用技巧和想像力產生新想法或新事物的能力」。為了擁有能夠變得有創造力的「能力」，一個人必須在日常生活中積累知識，這樣當有一天你需要新知識時，你的大腦才能為你提供足夠的信息（我們的圖式或信息庫）來成為你的「靈感」。知識的積累不是一天完成的，它必須經歷一個非常複雜和漫長的過程，才能儲存在我們的大腦中以便日後檢索。這就是為什麼那些投入大量時間成為某些領域專家的人值得我們的尊敬，並應該被授予學術榮譽，例如科學家和研究人員。許多獎項是舉世聞名的。你知道以下獎項嗎？

1. For the highest achievement in film production? (Academy Awards / Oscars)

1. 電影製作的最高成就獎？（奧斯卡金像獎）

2. To people who have done the most significant work in physics, chemistry, medicine, literature, and peace? (Nobel Prize)

2. 頒給在物理、化學、醫學、文學和和平領域做出最重大貢獻的人？（諾貝爾獎）

3. For the most excellent work in journalist, fiction, and non-fiction in the U.S.? (Pulitzer Prize)

3. 頒給美國最優秀的新聞、小說和非小說作品？（普立茲獎）

4. To the worst film of the year? (Golden Raspberry Awards / Razzies)

4. 頒給年度最爛的電影？（金酸莓獎）

5. To people whose work in television has been excellent? (Emmy Awards)

5. 頒給在電視領域表現卓越的人？（艾美獎）

6. In the U.S. for special achievement in the popular music recording industry? (Grammy Awards)

6. 美國流行音樂錄音工業的特殊成就獎？( 格萊美獎 )

7. To the best film at the Cannes Film Festival in France? (Palme d'Or)

7. 法國坎城影展的最佳影片獎？( 金棕櫚獎 )

8. To the highest scorer in soccer? (Golden Boot)

8. 足球賽中的神射手獎？( 金靴獎 )

My guess is, at least, you will get “the Nobel Prize” right. Most of us know the Nobel Prize; however, have you heard about the “Ig Nobel Prize”? This is the prize that is getting more and more attention nowadays. Therefore, let us learn about it, so we can keep up with the world.

我的猜測是，至少你會答對「諾貝爾獎」。我們大多數人都知道諾貝爾獎；然而，你聽說過「搞笑諾貝爾獎」嗎？這是如今越來越受到關注的獎項。因此，讓我們來了解它，這樣我們才能跟上世界的腳步。

## The Ig Nobel Prize / 搞笑諾貝爾獎

First, the name of the award requires some English knowledge. The word looks like it has some negative connotation. So, the name of the award is a play of the word ‘ignoble’. When you separate ‘ig’ and ‘noble’, and change the spelling of ‘noble’ into ‘nobel’, then you get “Ig Nobel” prize. So, the name gives us some ideas about what the award is. Ig Nobel Prize is an actual award. It is awarded each year to people, usually scientists, who have made significant achievements that are funny and should not be reproduced. The first ceremonies of the Ig Nobel Prize were held at MIT, but later moved to Harvard University due to the objection of the MIT administrators.

首先，這個獎項的名稱需要一些英文知識。這個詞看起來有一些負面的含義。所以，這個獎項的名字是「ignoble」（不光彩的/卑微的）一詞的雙關語。當你把「ig」和「noble」分開，並把「noble」的拼寫改成「nobel」，你就得到了「搞笑諾貝爾獎（Ig Nobel Prize）」。所以，這個名字給了我們一些關於這個獎項是什麼的概念。搞笑諾貝爾獎是一個真實存在的獎項。它每年頒發給那些做出了有趣且不應被複製的重大成就的人，通常是科學家。搞笑諾貝爾獎的第一屆頒獎典禮在麻省理工學院（MIT）舉行，但後來由於麻省理工學院管理人員的反對，移到了哈佛大學舉行。

The founder of the Ig Nobel awards, Marc Abrahams, is with the Improbable Research. Marc Abrahams together with the governors of Improbable Research choose winners of the Ig Nobel Prize every year. In his inspiring talk at TedTalks in 2014 “Marc Abrahams: A science award that makes you laugh, then think”, he tells the world about why those winners of the Ig Nobel Prize are as important as the real Nobel Prize winners. Silly science can make the public interested in serious science and so the Igs are of critical importance. In his talk, he said:

搞笑諾貝爾獎的創始人馬克·亞伯拉罕斯（Marc Abrahams）任職於《不可思議研究年報》。馬克·亞伯拉罕斯與《不可思議研究年報》的理事們每年選出搞笑諾貝爾獎的得主。在2014年一場啟發人心的Ted演講中，他發表了《搞笑諾貝爾獎：讓你笑，然後思考的科學獎》，向世界介紹了為什麼這些搞笑諾貝爾獎得主與真正的諾貝爾獎得主一樣重要。滑稽的科學可以讓公眾對嚴肅的科學產生興趣，因此搞笑諾貝爾獎至關重要。他在演講中說：

“In 1991, I, together with bunch of other people, started the Ig Nobel prize ceremony. Every year we give out 10 prizes. The prizes are based on just one criteria. It’s very simple. It’s that you’ve done something that makes people laugh and then think. What you’ve done makes people laugh and then think. Whatever it is, there’s something about it that when people encounter it at first, their only possible reaction is to laugh. And then a week later, it’s still rattling around in their heads and all they want to do is tell their friends about it.

That' s the quality we look for.”

「在1991年，我和其他一群人一起創辦了搞笑諾貝爾獎頒獎典禮。我們每年頒發10個獎項。這些獎項僅基於一個標準。它非常簡單。那就是你做了一些讓人們發笑然後思考的事情。不論那是什麼，當人們第一次接觸到它時，他們唯一的反應就是笑。然後一週後，它仍然在他們的大腦中盤旋，而他們唯一想做的就是告訴他們的朋友。這就是我們尋找的品質。」

So, it is not as silly as it looks. The Improbable Research takes it very seriously. Every year, they choose their 10 winners based on this criteria from over 9,000 new nominations. After they decide the winners, they will contact the winners very quietly and offer them the chance to decline the award. Abrahams said “Happily for us, almost everyone who' s offered a prize decides to accept.” See, people in science have sense of humor too. The Ig Nobel Prize design is different every year, usually handmade and cheap. The ceremony at Harvard University takes place at Harvard' s biggest meeting place and classroom, which fits 1,100 people. Abrahams described:

所以，它並不像看起來那麼愚蠢。《不可思議研究年報》非常認真地對待它。每年，他們從9,000多個新提名中，基於這個標準選出10位得主。在決定得主後，他們會非常低調地與得主聯繫，並給予他們拒絕接受獎項的機會。亞伯拉罕斯說：「對我們來說很幸運的是，幾乎每個被授予獎項的人都決定接受。」你看，科學界的人也很有幽默感。搞笑諾貝爾獎每年的設計都不同，通常是手工製作且廉價的。在哈佛大學舉行的典禮在哈佛最大的會議場所和教室舉行，可容納1,100人。亞伯拉罕斯描述道：

“It' s jammed to the gills, and up on the stage, waiting to shake your hand, waiting to hand you your Ig Nobel prize, are a bunch of Nobel prize winners. That' s the heart of the ceremony. The winners are kept secret until that moment, even the Nobel laureates who will shake their hand don' t know who they are until they' re announced.”

「典禮現場擠得水洩不通，在講台上等待與你握手、等待將搞笑諾貝爾獎遞交給你的是一群真正的諾貝爾獎得主。這就是典禮的核心。得主的身份直到那一刻都是保密的，甚至連將與他們握手的諾貝爾獎得主在宣佈之前也不知道他們是誰。」

## Elena Bodnar's Emergency Mask / 埃琳娜·波德納爾的應急口罩

He introduced several winning achievements in his talk. One of them relates to our life recently is the emergency mask. "The final thing that I want to tell you about is a prize we gave to Dr. Elena Bodnar. Dr. Elena Bodnar invented a brassiere that in an emergency can be quickly separated into a pair of protective face masks. One to save your life, one to save the life of some lucky bystander. (Laughter) Why would someone do this, you might wonder. Dr. Bodnar came to the ceremony and she explained that she grew up in Ukraine. She was one of the doctors who treated victims of the Chernobyl power plant meltdown. And they later discovered that a lot of the worst medical problems came from the particles people breathed in. So she was always thinking after that about could there be some simple mask that was available everywhere when the unexpected happens. Years later, she moved to America. She had a baby. One day she looked, and on the floor, her infant son had picked up her bra, and had her bra on his face. And that's where the idea came from. She came to the Ig Nobel ceremony with the first prototype of the bra and she demonstrated."

他在演講中介紹了幾項獲獎成就。其中一項與我們最近的生活有關，那就是應急口罩。「我想告訴你們的最後一項是我們頒給埃琳娜·波德納爾 (Elena Bodnar) 博士的一個獎項。波德納爾博士發明了一款胸罩，在緊急情況下，它可以迅速拆卸成一對保護性口罩。一個用來救你自己的命，另一個用來救某個幸運的旁觀者。(笑聲) 你可能會想，為什麼會有人做這件事？波德納爾博士來到典禮現場，她解釋說她在烏克蘭長大。她是治療車諾比核電廠熔毀事故受害者的醫生之一。他們後來發現，許多最嚴重的醫療問題都來自人們吸入的微粒。所以從那以後，她一直在思考，當意外發生時，是否可以有一種隨處可得的簡單口罩。多年後，她搬到了美國。她生了個寶寶。有一天她看過去，在地上，她嬰兒期的兒子撿起了她的胸罩，並把胸罩戴在臉上。這就是這個靈感的來源。她帶著胸罩的第一個原型來到搞笑諾貝爾獎典禮，並進行了演示。」

Dr. Bodnar took off a brassiere and made two emergency masks to put on Professor Paul Krugman, the Nobel laureate in economics in 2008 and Professor Wolfgang Ketterle, the Nobel laureate in Physics in 2001 in the ceremony. Everyone in the ceremony laughed, I laughed when I first saw it a few years back too. However, after the Covid pandemic, if we think more seriously about it, this is not goofy science anymore; it may just save lives when an emergency happens. Other discoveries Abrahams mentioned in his talk also made contributions to the real science. For instance, Doctor Ivan Schwab's research on "Why don't woodpeckers get headaches?" (2006) and Dr. Emmanuel Ben-Boussan's research on how doctors could minimize the danger of exploding patients while they perform colonoscopies in 2012. There are other famous winners, and I would like to present them to you selectively based on the criteria of level of interest, novelty, category, level of acceptance, level of comprehension and perception and language; therefore, some award winners which require professional knowledge are not listed for they require high level of scientific and linguistic knowledge.

波德納爾博士脫下胸罩，製成兩個應急口罩，並在典禮上戴在2008年諾貝爾經濟學獎得主保羅·克魯曼 (Paul Krugman) 教授和2001年諾貝爾物理學獎得主沃爾夫岡·克特勒 (Wolfgang Ketterle) 教授的臉上。典禮上的每個人都笑了，幾年前我第一次看到它時也笑了。然而，在新冠疫情大流行之後，如果我們更嚴肅地思考它，這不再是愚蠢的科學了；當緊急情況發生時，它真的可能挽救生命。亞伯拉罕斯在演講中提到的其他發現也對真正的科學做出了貢獻。例如，伊凡·施瓦布 (Ivan Schwab) 博士關於「為什麼啄木鳥不會頭痛？」的研究 (2006年)，以及伊曼紐爾·本-布桑 (Emmanuel Ben-Boussan) 博士關於醫生在2012年進行大腸鏡檢查時如何將患者爆炸危險降至最低的研究。還有其他著名的得主，我想根據趣味性、新穎性、類別、接受度、理解力和感知度等標準選擇性地向大家展示；因此，一些需要專業知識的獲獎者並未列出，因為他們需要高水準的科學和語言知識。

## Selective List of Ig Nobel Winners (1994 - 2022) / 搞笑諾貝爾獎得主精選清單 (1994 - 2022年)

1994 Peace: Lee Kuan Yew, for his thirty-year study of the effects of punishing three million citizens of Singapore whenever they spat, chewed gum, or fed pigeons.

1994年和平獎：新加坡前總理李光耀獲獎，因其對處罰隨地吐痰、嚼口香糖或餵鴿子的三百萬新加坡公民的效果進行了長達三十年的研究。

1995 Medicine: Robert Beaumont, for his incisive study “Patient Preference for Waxed or Unwaxed Dental Floss” .

1995年醫學獎：羅伯特·比蒙 ( Robert Beaumont ) 獲獎，因其深入的研究「患者對打蠟或不打蠟牙線的偏好」。

1995 Nutrition: John Martinez, for luak coffee, the world’ s most expensive coffee, which is made from coffee beans ingested and excreted by the luak, a bobcat-like animal native to Indonesia.

1995年營養學獎：授予 J. Martinez & Company 的約翰·馬丁內斯 ( John Martinez )，因為「麝香貓咖啡」是世界上最昂貴的咖啡，由印尼本土一種類似山貓的動物吞食並排泄的咖啡豆製成。

1995 Peace: The Legislative Yuan of the Republic of China (Taiwan), for demonstrating that “politicians gain more by punching, kicking and gouging each other than by waging war against other nations” , in the context of legislative violence.

1995年和平獎：授予中華民國（台灣）立法院，因為他們證明了「在立法暴力背景下，政治家通過互相拳打腳踢和挖眼珠獲得的利益，比向其他國家發動戰爭更多」。

1996 Physics: Robert Matthews of Aston University, England, for his studies of Murphy’ s Law, and especially for demonstrating that toast often falls on the buttered side.

1996年物理學獎：授予英國阿斯特頓大學的羅伯特·馬修斯 ( Robert Matthews )，因其對墨菲定律的研究，特別是證明了「塗了奶油的吐司經常掉落在塗有奶油的一面」。

1997 Economics: Akihiro Yokoi and Aki Maita for diverting millions of man-hours of work into the husbandry of virtual pets (Tamagotchi).

1997年經濟學獎：授予橫井昭裕和真板亞紀，因為他們將數百萬工時引導到虛擬寵物（電子雞）的飼養中。

1999 Literature: The British Standards Institute for its six-page specification of the proper way to make a cup of tea.

1999年文學獎：授予英國標準協會，因為其制定了「如何沖泡一杯好茶」的六頁規範。

1999 Sociology: Steve Penfold, of York University in Toronto, for doing his PhD thesis on the history of Canadian doughnut shops.

1999年社會學獎：授予多倫多約克大學的史蒂夫·彭福爾德 ( Steve Penfold )，因其對加拿大甜甜圈店歷史的博士論文。

2000 Chemistry: Donatella Marazziti et al. of University of Pisa, Italy, and Hagop Akiskal of the University of California, San Diego, for their discovery that, biochemically, romantic love may be indistinguishable from having severe obsessive-compulsive disorder.

2000年化學獎：授予義大利比薩大學的 Donatella Marazziti 等人，以及加州大學聖地牙哥分校的 Hagop Akiskal，因為他們發現「從生物化學角度看，浪漫的愛與嚴重的強迫症可能無法區分」。

2000 Computer Science: Chris Niswander of Tucson, Arizona, for inventing PawSense, software that detects when a cat is walking across your computer keyboard.

2000年計算機科學獎：授予亞利桑那州圖森市的克里斯·尼斯萬德 ( Chris Niswander )，因為他發明了 PawSense，這是一種能檢測貓何時在電腦鍵盤上走過的軟體。

2002 Hygiene: Eduardo Segura, from Tarragona, Catalonia (Spain), for inventing a washing machine for cats and dogs.

2002年衛生獎：授予西班牙加泰羅尼亞的 Eduardo Segura，因為他發明了貓狗專用的洗滌機。

2002 Literature: Vicki L. Silvers of the University of Nevada, Reno and David S. Kriner of Central Missouri State University, for their colorful report “The Effects of Pre-Existing Inappropriate Highlighting on Reading Comprehension.”

2002年文學獎：授予內華達大學的 [Vicki L. Silvers](#) 和中央密蘇里州立大學的 [David S. Kriner](#)，因其發表的報告《預先存在的不當螢光筆標記對閱讀理解的影響》。

2003 Interdisciplinary Research: Stefano Ghirlanda, Liselotte Jansson, and Magnus Enquist of Stockholm University, for their inevitable report “Chicken Prefer Beautiful Humans.”

2003年跨學科研究獎：授予斯德哥爾摩大學的 [Stefano Ghirlanda](#) 等人，因其報告《雞偏愛漂亮的人類》。

2004 Peace: Daisuke Inoue of Hyogo Prefecture, Japan, for inventing Karaoke, thereby providing an entirely new way for people to learn to tolerate each other.

2004年和平獎：授予日本兵庫縣的井上大佑，因為他發明了卡拉OK，從而為人們提供了一種學習容忍彼此的全新方式。

2004 Psychology: Daniel Simons of the University of Illinois at Urbana-Champaign and Christopher Chabris of Harvard University, for demonstrating that when people pay close attention to something, it is all too easy to overlook anything else – even a woman in a gorilla suit.

2004年心理學獎：授予伊利諾大學香檳分校的 [Daniel Simons](#) 和哈佛大學的 [Christopher Chabris](#)，因為他們證明了「當人們密切關注某事時，很容易忽視其他任何事情——甚至是穿著大猩猩服裝的女人」。

2004 Public Health: Jillian Clarke of the Chicago High School for Agricultural Science, and the Howard University, for investigating the scientific validity of the five-second rule about whether it is safe to eat food that has been dropped on the floor.

2004年公共衛生獎：授予芝加哥農業科學高中的 [Jillian Clarke](#) 和霍華德大學，因為他們調查了關於「掉在地上的食物在五秒鐘內吃掉是否安全」的五秒定律的科學有效性。

2005 Economics: Gauri Nanda of the Massachusetts Institute of Technology, for inventing Clocky, an alarm clock that runs away and hides, repeatedly, thus ensuring that people get out of bed, and thus theoretically adding many productive hours to the workday.

2005年經濟學獎：授予麻省理工學院的 [Gauri Nanda](#)，因為她發明了 [Clocky](#)，這是一個會逃跑並躲藏的鬧鐘，從而確保人們起床，理論上為工作日增加了許多生產工時。

2006 Physics: Nic Sveson and Piers Barnes of the Australian Commonwealth Scientific and Industrial Research Organisation, for calculating the number of photographs that must be taken to (almost) ensure that nobody in a group photo will have their eyes closed.

2006年物理學獎：授予澳大利亞聯邦科學與工業研究組織的 [Nic Sveson](#) 和 [Piers Barnes](#)，因為他們計算了「為確保合照中幾乎沒有人閉眼，必須拍攝的照片數量」。

2008 Medicine: Rebecca Waber et al., for demonstrating that expensive placebos are more effective than inexpensive placebos.

2008年醫學獎：授予 [Rebecca Waber](#) 等人，因為他們證明了「昂貴的安慰劑比便宜的安慰劑更有效」。

2009 Medicine: Donald L. Unger of Thousand Oaks, California, US, for investigating a possible cause of arthritis of the fingers, by diligently cracking the knuckles of his left hand but not his right hand every day for 50 years.

2009年醫學獎：授予加州 [Donald L. Unger](#)，因為他通過每天堅持捏響自己左手關節而不捏右手關節持續50年，來調查指關節炎的可能原因。

2009 Veterinary Medicine: Catherine Douglas and Peter Rowlinson of Newcastle University, UK, for showing that cows with names give more milk than cows that are nameless.

2009年獸醫學獎：授予英國紐卡索大學的 [Catherine Douglas](#) 和 [Peter Rowlinson](#)，因為他們證明了「有名字的母牛比無名字的母牛產奶更多」。

2010 Peace: Richard Stephens et al. of Keele University, UK, for confirming the widely held belief that swearing relieves pain.

2010年和平獎：授予英國基爾大學的 [Richard Stephens](#) 等人，因為他們證實了「說髒話可以緩解疼痛」這一廣泛流傳的信念。

2011 Peace: Arturas Zuokas, the mayor of Vilnius, Lithuania, for demonstrating that the problem of illegally parked luxury cars can be solved by running them over with a tank.

2011年和平獎：授予立陶宛維爾紐斯市長 [Arturas Zuokas](#)，因為他證明了「非法停放豪華轎車的問題可以通過用坦克將其壓扁來解決」。

2013 Probability: Bert Tolkamp et al., for making two related discoveries: First, that the longer a cow has been lying down, the more likely that cow will soon stand up; and second, that once a cow stands up, you cannot easily predict how soon that cow will lie down again.

2013年概率獎：授予 [Bert Tolkamp](#) 等人，因為他們做出了兩個相關的發現：首先，母牛躺下的時間越長，牠很快站起來的可能性就越大；其次，一旦母牛站起來，你無法輕易預測牠很快會再躺下。

2014 Art: Marina de Tommaso et al., for measuring the relative pain people suffer while looking at an ugly painting, rather than a pretty painting, while being shot in the hand by a powerful laser beam.

2014年藝術獎：授予 [Marina de Tommaso](#) 等人，因為他們測量了「當人們的手被強大的雷射光束照射時，看著一幅醜陋的畫作比看著一幅美麗的畫作，所承受的相對疼痛感」。

2014 Physics: Kiyoshi Mabuchi et al., for measuring the amount of friction between a shoe and a banana skin, and between a banana skin and the floor, when a person steps on a banana skin that is on the floor.

2014年物理學獎：授予馬淵清資等人，因為他們測量了「當人踩到地上的香蕉皮時，鞋子與香蕉皮之間，以及香蕉皮與地面之間的摩擦力」。

2015 Economics: The Bangkok Metropolitan Police, for offering to pay policemen extra cash if the policemen refuse to take bribes.

2015年經濟學獎：授予曼谷大都會警察局，因為他們提出如果警察拒絕收受賄賂，將向警察發放額外的現金。

2017 Anatomy: James Heathcote, for his medical research study “Why Do Old Men Have Big Ears?”

2017年解剖學獎：授予 [James Heathcote](#)，因其醫學研究報告《為什麼老年人有大耳朵？》。

2018 Anthropology: Tomas Persson et al., for collecting evidence in a zoo that chimpanzees imitate humans about as often, and about as well, as humans imitate chimpanzees.

2018年人類學獎：授予 [Tomas Persson](#) 等人，因為他們在動物園收集證據，證明「黑猩猩模仿人類的頻率和質量與人類模仿黑猩猩差不多」。

2019 Psychology: Fritz Strack, for discovering that holding a pen in one’s mouth makes one smile, which makes one happier – and for then discovering that it does not.

2019年心理學獎：授予 [Fritz Strack](#)，因為他發現「口中含筆會讓人微笑，從而使人更快樂——而隨後發現其實並不會」。

2020 Medical Education: Jair Bolsonaro of Brazil, Boris Johnson of the United Kingdom, Narendra Modi of India, Andrés Manuel López Obrador of Mexico, Alexander Lukashenko of Belarus, Donald Trump of the United States, Recep Tayyip Erdoğan of Turkey, Vladimir Putin of Russia, and Gurbanguly Berdimuhamedow of Turkmenistan, for using the COVID-19 viral pandemic to teach the world that politicians can have a more immediate effect on life and death than scientists and doctors can.

2020年醫學教育獎：授予巴西總統波索納洛、英國首相強森、印度總理莫迪、美國總統川普、俄羅斯總統普丁等人，因為他們「利用新冠疫情向世界證明，政治家對生死的直接影響，可以比科學家和醫生更即時」。

2021 Physics: Alessandro Corbetta et al., for conducting experiments to learn why pedestrians do not constantly collide with other pedestrians.

2021年物理學獎：授予 Alessandro Corbetta

等人，因為他們進行了實驗，以了解「為什麼行人在路上不會經常與其他行人相撞」。

2022 Applied Cardiology: Eliska Prochazkova et al., for seeking and finding evidence that when new romantic partners meet for the first time and feel attracted to each other, their heart rates synchronize.

2022年應用心臟病學獎：授予 Eliska Prochazkova

等人，因為他們尋找並發現了證據，證明「當新的浪漫伴侶第一次見面並感到彼此吸引時，他們的心率會同步」。

2022 Literature: Eric Martínez, Francis Mollica, and Edward Gibson, for analyzing what makes legal documents unnecessarily difficult to understand.

2022年文學獎：授予 Eric Martínez 等人，因為他們分析了「是什麼讓法律文件變得不必要地難以理解」。

2022 Medicine: Marcin Jasiński et al., for showing that when patients undergo some forms of toxic chemotherapy, they suffer fewer harmful side effects when ice cream replaces one traditional component of the procedure.

2022年醫學獎：授予 Marcin Jasiński 等人，因為他們表明「當患者接受某些形式的有毒化療時，如果用冰淇淋代替該療程中的一個傳統成分，他們所遭受的有害副作用會更少」。

2022 Engineering: Gen Matsuzaki et al., for trying to discover the most efficient way for people to use their fingers when turning a knob.

2022年工程學獎：授予 Gen Matsuzaki 等人，因為他們試圖發現「人們在轉動旋鈕時使用手指的最有效方式」。

2022 Peace: Junhui Wu et al., for developing an algorithm to help gossipers decide when to tell the truth and when to lie.

2022年和平獎：授予 Junhui Wu 等人，因為他們開發了一種算法，以幫助「傳播閒話者決定何時說真話、何時說謊」。

2022 Economics: Alessandro Pluchino, Alessio Emanuele Biondo, and Andrea Rapisarda, for explaining, mathematically, why success most often goes not to the most talented people, but instead to the luckiest.

2022年經濟學獎：授予 Alessandro Pluchino

等人，因為他們用數學解釋了「為什麼成功最常不屬於最有才華的人，而是屬於最幸運的人」。

Of course, we are not asking you to memorize these winners and their awards. What I would like to say in this unit is to show you how interesting science can be and how people who devote their lives into a specific area deserve our respect.

當然，我們並不是要你記住這些獲獎者和他們的獎項。在這個單元中，我想說的是向你展示科學可以有多麼有趣，以及那些將一生奉獻給特定領域的人如何值得我們的尊敬。
